

**Tom Baionno**  
**Chief Information Officer**  
**Joined SIAA in 2013**

---

As Chief Information Officer, Tom Baionno is responsible for the administration of a complex, multi-platform computing, telecommunications, networking and IT system at SIAA. He supports current and future needs for emerging technologies and advises senior leadership in the design and delivery of administrative systems to enable efficient, effective and secure processing of management information.

Tom oversees coordinating all information technology activities, all websites, applications, servers, and management of four staff and three major vendors.

Prior to joining SIAA, Tom was in the software business for 16 years as an Application Engineer. In this role, he provided system configuration, implementation, custom application design, guidance and support to hundreds of companies. Prior to that, he served nine years as IT Manager with a telecom manufacturer.

In 2017, Tom was named Chief Information Officer for SIAA one year after being promoted from Director of Information Technology. Prior to that he was Senior Business Analyst at SIAA for three years.

Tom earned a B.S. in Computer Science from Franklin Pierce University in Concord, New Hampshire.
